

# Optomap Retinal Imaging

In our continued efforts to bring the most advanced technology to our patients, we are proud to announce the inclusion of our Optomap Retinal Imaging as an integral part of your exam today.

Our doctors are concerned about retinal problems including macular degeneration, glaucoma, retinal holes or detachments, and systemic diseases such as diabetes, stroke, and high blood pressure. These conditions can lead to serious ocular or health problems, including partial loss of vision or blindness, and often develop without warning and progress with no symptoms.

## Optos Retinal Exam Benefits:

- An in- depth view of the retinal layers where diseases can start.
- Provides an Optos digital image at the time of your exam to discuss and answer questions about your eye health.
- This also provides an annual, permanent record for your medical record, which gives doctors comparisons for tracking and diagnosing potential eye disease.

### Optomap Exam

NO blurred vision  
NO light sensitivity  
Takes less than 2 minutes to complete  
Permanent digital image that can be reviewed each year  
You are able to view your images and discuss them

with your doctor

### Dilated Exam

Blurred near vision for 4-6 hours  
Light Sensitivity for 4-6 hours  
No permanent record of retina  
Longer office visits waiting for drops to take effect  
Only the doctor can see the retina  
your doctor at today's visit

### Early detection is crucial.

Our doctors recommend that ALL patients have a thorough examination of their retina every year. **Without the Optomap or a dilated examination, the doctor cannot fully assess the health of your eye.** There is an additional fee of \$35 for the Optomap. This procedure will not be covered by insurance. Dilation may still be utilized in rare instances.

I elect to have the Optomap Retinal Exam today for \$35.

I decline the Optomap Exam and prefer to be dilated. I have been informed of the side effects listed above.
